

First Iteration

Submission:

1. GitHub repo: <https://github.com/XJBCoding/NewsServer>
2. Continuous Integration
 - a. Pre-commit CI configuration file: [.git/pre-commit](#)
 This is not available on the GitHub repository, but [requirements/dev.txt](#) will install the Python package for [git-pylint-commit-hook](#), and the file [.git/pre-commit](#) looks like this:

```
#!/usr/bin/env bash
git-pylint-commit-hook > logs/log_pylint.txt
```
 - b. Post-commit CI configuration file: [.travis.yml](#)
3. Folders of reports/logs
 - a. Post-commit build: This is not really relevant to us because we don't really build an executable file. The Flask app just launches via ``python login.py``.
 - b. Style-checker/bug-finder: [logs/logs_pylint.txt](#)
 - c. Unit-testing: [logs/logs_travis.txt](#)

Currently, if you run ``python login.py``, the main page looks like this:
